is running through your pipes**

Pipe markers

About BRADY

Once you have worked with BRADY, our name will stick with you, (just like our labels) because BRADY is one of the world's leading labelling and identification specialists.

Innovative

At BRADY we continue to improve. We have many customers from all industries, and we strive to be ahead of their needs by continuing to invest in research for even more performant solutions. By developing more user-friendly and efficient concepts, we give our thousands of customers the best in the market.

Strength

At BRADY, we believe our biggest strength is the wide range of identification and safety solutions we can offer our customers, whether it's labelling the smallest component or complete signage for an entire warehouse. We're also proud to offer many products and services - from printers, scanners and software to service contracts and on-site training - that compliment any identification job. And don't forget, our wide network of expert distributors can always offer you a tailor-made solution to meet your specific requirements.

Trust

For over a hundred years, BRADY has been connected with quality, trust and stability. We demand the best for your products and services, because we know, better than anyone, the importance of good and reliable identification. Identification looks like a small detail, but every professional knows that this kind of detail is crucial to any business.

Inform

We also have specialised dealers in your region, who can answer all your identification, safety and labelling questions, specific to your activity. They will be happy to provide you with all kinds of options and solutions with no obligation.

Brady products are sold on the condition that the purchaser will test them in actual use and determine for himself/herself their suitability to his/her intended purpose. Brady warrants to the purchaser that Brady products are free from defects in material and workmanship but limits its obligation under this warranty to the replacement of the product which has been shown to Brady's satisfaction to have been defective at the time of its purchase.

The warranty does not extend to any persons who have acquired the product from the purchaser. It is in lieu of any other warranty, including every warranty of sale-ability, marketability or suitability for the intended purpose, and is also in lieu of any other obligation or liability on the part of Brady.

Under no circumstances will Brady be liable for losses, damage, costs or subsequent damage of whatever nature which may arise in connection with the use of, or inability to use, Brady's products.

The Brady Advantage

When it comes to identification, safety and compliance, there's a clear advantage to working with Brady. We put our customers first in everything we do.

Our goal is to give you an unrivalled customer experience. We are relentlessly committed to performance and excellence - in our products, services and people.

Our products and solutions perform in ways that others simply can't match. Our people perform in ways that regularly exceed your expectations. And our focus and discipline work toward solid, long-term performance for our customers.

In short, Brady is the company you trust when performance matters most.

- 32 Tape strip roll
- 32 Blank HPHV carrier
- 32 Heavy-duty mounting clips

33 Print your own pipe markers

The benefits of pipe marking

The purpose of pipe marking is to ensure quick recognition of pipe contents, flow direction and their associated risks. Pipe marking is most successful when used in combination with proper work methods, instructions and accident prevention measures and training. These can teach the right response after recognising pipe contents in case of a leak for example.

Well identified pipes offer a number of benefits. They can

- Save lives - Unmarked pipes and valves can endanger employees, contractors and first responders
- Cut costs - Well identified pipes can help to avoid costly errors
- Increase productivity - Pipe markers immediately inform employees when and where to intervene
- Increase efficiency – Pipe markers increase the efficiency of maintenance teams and external contractors
- Increase compliance - Colour coded pipe markers increase pipe content recognition speed and compliance with ISO 20560, national, or company standards

Laws

The European Union has laid out a number of minimum requirements for the placement of signs on containers and pipes in Annex III of the Council Directive 92/58/EEC from June 24, 1992. EU Member states need to include these minimum requirements in national legislation.

- Pipe markers must be placed on visible sides
- Pipe markers must be placed at the most dangerous points and at intervals
- GHS/CLP icons must be used to identify substances or mixtures
- Pipe markers must be made out of materials suitable to the environment
- Where the level of natural light is poor, phosphorescent colours, reflective materials or artificial lighting should be used

Norms

The international norm for pipe contents identification is ISO 20560. It includes rules for the size of pipe markers, viewing distances, GHS/CLP icons, warning icons, colour coding and other.

Norms can be purchased from the official standardisation organisations in every country. Brady can supply pipe markers that are compliant with your standard of choice.

Indoor, outdoor and outdoor+ pipe markers

	Adhesive	Non adhesive		
indoor	 <p>B-7543P</p>	 <p>B-7560P</p>		
outdoor	 <p>B-7541P</p>	 <p>B-7561P</p>		Top Seller
outdoor+	 <p>B-7529P</p>	 <p>B-7562P</p>		Top Quality

Sheet versus roll

Pipe markers can be ordered on sheets or on rolls. The choice is usually determined by what plants are most familiar with as the functional difference between sheets and rolls in the end, is minimal. However, sheets can be easier to use in some plants, while others will have more use for rolls.

Sheet

- are self-adhesive
- can be used on a variety of pipe diameters
- can be used with pipe marker carriers

Roll

- can be non-adhesive or self-adhesive
- must be ordered in relation to pipe marker diameter
- can be wrapped around pipes
- 360° visibility

Available material types

Order only the best pipe markers for your environment. Carefully consider the options below for maximum durability and return on investment. Contact Brady for more support.

	INDOOR (no laminate)	OUTDOOR (clear laminate)	OUTDOOR+ (UV-blocking laminate)
Outdoor durability	1 year	3-5 years	10 years
Chemical resistance	Medium	Excellent	Excellent
Abrasion resistance	Medium	Excellent	Excellent
Sheet or roll			
Standard	B-7543P	B-7541(P*)	B-7529P
For small pipe diameters		B-7548	
Linerless rolls			
Non-adhesive	B-7560P	B-7561P	B-7562P
With adhesive		B-7520	

**UL approved and BS5609 certified*

Available material types (Continued)

All colour codes available:

- Standard Brady colours (PIT)
- British Standard BS 1710/4800
- Marine ISO 14726
- ISO 20560
- Norwegian standard NS813
- German Standard DIN 2403
- Swedish Standard SS741
- American standard ASME A13.1
- Other: please provide the RAL/Pantone colours

Note: If you don't specify a colour range we will deliver the pipe markers in Brady standard colours

Additional information:

- GHS symbols, substance name or CAS-number
- Warning symbol(s)
- Direction arrow(s)
- Proof needed

Quantity:

Provide the number of pipe markers you need to receive a quote.

Pipe marking: an overview

Maintenance tip

- The Signs & Signals Regulations recommend that markers should be mounted on all visible sides of the pipe, be of durable construction and used in conjunction with pictograms, where recommended.
- The area that the pipe marker is applied to should be clean, dry and free from grease and dirt.

Where to apply pipe markers?

At frequent intervals on straight pipe runs.

Where pipes pass through floors and walls, mark both sides.

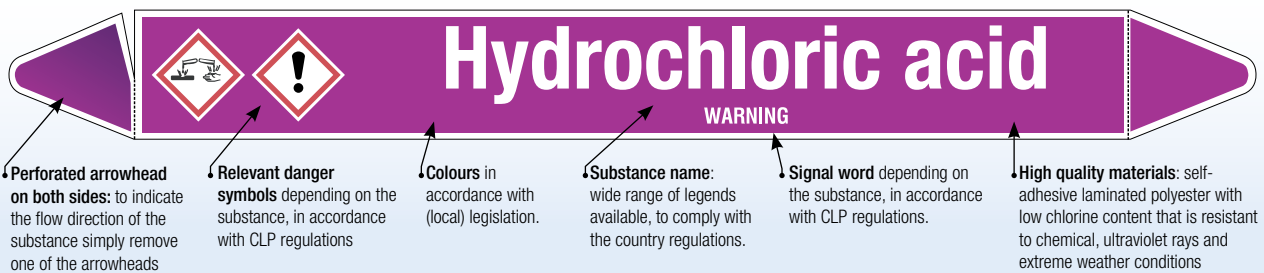

Individual pipe markers

European Standard pipe markers:

- Reinforce safety and aid maintenance.
- For Dangerous Substances the Chemical symbols conform to European regulations 1272/2008, 790/2009 and 286/2011.
- UV-resistant.
- Withstands temperatures from -40° to 120°C. Min. application temperature is 5°C.
- Available in 7 styles and more than 300 legends.

Brady's individual pipe markers

For more information about individual pipe markers on liner, see page 11.

Individual pipe markers on liner (B-7541)

- Available in four sizes.
- For standard text the signal word and hazard symbols, if relevant and necessary, are automatically printed on the marker. This saves you having to identify the appropriate symbol. For custom text this information will need to be provided by the customer.
- Markers are printed with a contrasting border in the same colour as the text for improved visibility.
- The arrows are perforated, which means you don't need scissors to remove the surplus arrow.

Linerless pipe markers (B-7520)

- Fast & easy - just take the pipe marker from the roll and apply it.
- Environmentally friendly - no waste!
- The arrows are perforated, which means you don't need scissors to remove the surplus arrow.

For more information about linerless pipe markers, see page 16.

Roll form pipe markers

The design and layout of Brady's roll form markers ensure maximum visibility from all sides. Not only is readability improved by printing the legends in different directions, but also by the different formats available.

These roll form markers are produced in two formats: one for pipes under 70 mm in diameter, and another for pipes over 70 mm in diameter. Both formats come in two widths. For markers without symbols the roll width is 100 mm; with symbols the roll width is 127 mm.

The length of the rolls is always 33 metres.

Different layout types

	Pipe Diameter (mm)	Markers per Roll* (for linerless markers)	Markers per Card/Roll (on liner)	Width x Height	GHS Symbols
Individual Markers on liner or linerless - Type 1					
	less than 20 mm	-	5	150 mm x 12 mm	with/without
	20-49	30	4	250 mm x 26 mm	with/without
	50-99	30	3	355 mm x 37 mm	with/without
	greater than 100 mm	30	2	450 mm x 52 mm	with/without
Roll Form Markers on liner or linerless - Type 2 (33m length rolls)					
	less than 70 mm	-	505	100 mm x 60 mm	without
	less than 70 mm	-	505	127 mm x 60 mm	with
Roll Form Markers on liner or linerless - Type 3 (33m length rolls)					
	greater than 70 mm	-	220	100 mm x 150 mm	without
	greater than 70 mm	-	220	127 mm x 150 mm	with

*Markers per roll are the total amount of markers supplied. These will be supplied in three rolls of 10 markers for sizes: 250 x 26 mm and 355 x 37 mm and 2 rolls of 15 markers for size 450 x 52 mm

Danger symbols

From 0 and up to 6 different danger symbols can be shown on the pipe marker, depending on the substance and in accordance with the CLP regulation.

								
GHS 01 Explosives Self reactive Organic peroxides	GHS 02 Flammable Self-reactive Pyrophoric liquids & solids Self-heating reactive Emit flammable gases Organic Peroxides	GHS 03 Oxidising	GHS 04 Gases under pressure Liquefied gases Refrigerated liquefied gases Dissolved gases	GHS 05 Corrosive Skin corrosion Serious eye damage	GHS 06 Acute toxicity	GHS 07 Acute toxicity Skin irritation Eye irritation Skin sensitisation Respiratory tract irritation Specific Target Organ Toxicity	GHS 08 Respiratory sensitisation Germ cell mutagenicity Carcinogenicity Reproductive toxicity Specific Target Organ Aspiration hazard	GHS 09 Hazardous to the aquatic environment

Pipe markers (on liner) - standard legends

i The sizes shown for type 2 and type 3 roll form pipe markers are the actual marker size.
All rolls are 33 metres long.

Individual pipe markers

Type 1

Roll form pipe markers

Type 2 Pipe diameter < 70 mm

Type 3 Pipe diameter > 70 mm

Why pipe marking?

Brady pipe markers enhance safety, save time and reduce costs.

- **Enhance safety.** Unmarked pipes and valves can cause danger to life and damage to equipment. Brady pipe markers will help ensure that you, your staff and your premises remain safe.
- **Reduce costs.** By correctly identifying pipes, errors can be prevented. Accidents caused by negligence lead to both physical and psychological grief and often cost companies large amounts of money.
- **Save time.** Clear, concise identification with Brady pipe markers, made from high performance laminated polyester, will stay in place and remain readable, due to high resistance to chemicals, ultraviolet rays and extreme weather conditions, saving valuable time by reducing the need to continually re-identify your pipes.

BS 1710 approved pipe markers

The **British Standard BS 1710** pipe markers are globally recognised. The usage of pipe markers compliant to the BS 1710 will increase your plant safety. These pipe markers are a combination of 2 colour categories.

- Basic identification colour
- Code indications

Pipe marker colours

Application of safety colours and code indication colours

Basic identification colour

Identifies the substance group of the substance flowing through the pipes.

Pipe content	Colour
Water	Green
Steam	Silver-grey
Oils	Brown
Gases	Yellow ochre
Acids and alkalis	Violet
Air	Light blue
Waste effluent	Black
Electrical services and ventilation ducts	Orange

Code indication and safety colours

Additional information must be added in code indication colours or safety colours for these pipe contents:

Safety colours	
Fire	Red
Water from a public supply	Auxiliary blue
Water from any other source	Flint grey
Warning	Yellow

Code indication colours	
Refrigeration	Blue
Medical gases and refrigeration	Golden brown
Building services and refrigeration	Crimson
Building services and refrigeration	Emerald green
Building services	Salmon pink
Building services and medical gases	Primrose
Building services and medical gases	White
Medical gases	French grey
Medical gases	French blue
Refrigeration	Sea green
Refrigeration	Dark mauve

Width of the colour bands on the marker

Min. Pipe Diameter (mm)	Max. Pipe Diameter (mm)	Basic identification colours (mm)	Code indication or safety colour (mm)	Basic identification colours (mm)
0	50	50	30	50
51	100	100	75	100
101	-	150	150	150

Direction of flow and supplementary information

- An arrow or arrow shaped pipe marker indicates the content flow direction
- Supplementary information such as content name, temperature, flow and return

Arrow can be easily torn off on either side of the marker to indicate the content flow direction.

Standard pipe marker sizes

Roll

Pipe diameter	Width (mm)	Length (mm)
>100 mm	450	30

Single marker

Pipe diameter	Width including two arrows (mm)	Height (mm)	Markers/ card
<50 mm	190	30	1
50 - 100 mm	330	40	1
>100 mm	530	60	1

Pipe marker materials

- Self adhesive polyester (standard)
- Non-adhesive polyester (upon request)

Contact us to request customised pipe markers. We will create any pipe marker you need, taking into account the regulations and your personal specifications regarding text, colour, size and layout.

Standard BS 1710 pipe marker range

Marine pipe markers

- Increase safety: highlight pipe contents with compliant ISO 14726 markers that can resist marine environments
- Complete offer: fully customisable pipe markers, signs, labels, tags, floor markers, Lockout/Tagout and spill control

ISO 14726 compliant marine pipe markers

Marking pipes on ships and offshore sites is of the utmost importance to strengthen safety at all times. Accidents, injuries and damage to machines and equipment can originate from not knowing which substances flow through pipes.

The ISO 14726 standard (International Standard Organisation) specifies the principle colours for the identification of substances in pipes. ISO 14726-2 specifies additional colour codes that allow a more detailed identification of the substance.

ISO 14726 pipe markers are a combination of 2 colour categories:

- Main colours for media groups
- Additional colour for different media or functions

Basic identification colour

The ISO 14726 standard defines the principle colours for identifying pipes. Each of the following colours indicates a certain group of substances.

Pipe content	Colour
Waste media	Black RAL 9005
Fresh water	Blue RAL 5015
Sea water	Green RAL 6018
Fuel	Brown RAL 8001
Non flammable gases	Grey RAL 7001
Acids and alkalis	Violet RAL 4001
Waste effluent	Black
Oil other than fuel	Orange RAL 2003
Steam	Silver RAL 9006
Air in ventilation systems	White RAL 9010
Fire fighting	Red RAL 3000
Flammable gases	Yellow-Ochre RAL 1021

ISO 20560 compliant pipe markers

Clearly identify pipes for more safety at work

Advantages:

- Clear pipe identification for increased safety
- Reliable on any pipe in many environments
- Hassle-free

Example of a pipe marker design

Brady can supply any pipe marker you need, taking into account any regulations and company specifications regarding text, colour, symbols, size, layout and material. Below is an example of an ISO 20560 pipe marker design.

1. High quality materials: indoor, outdoor or outdoor+ quality to provide reliable pipe identification up to 10 years outdoors.

2. Relevant danger symbols: depending on the substance, in accordance with CLP regulations.

3. Substance name: wide range of legends available, to comply with the country regulations.

4. Colour code: substance colour code as determined by ISO 20560 or local legislation

5. Additional safety information: add information to increase workplace safety.

6. Flow direction: indicate which way pipe contents flows.

7. P&ID information: add a custom number for identification purposes.

8. Source & destination: indicate the source & destination connected by the pipe.

9. QR-code: add a code that can be scanned to unlock additional information.

Pipe marker size

- Minimum height = $(50 \times D) / L1$
- Minimum Length = $L1 + L2$

Contact your Brady distributor to receive a custom ISO 20560 quote!

ISO 20560 colour coding

Brady can supply any pipe marker you need, taking into account any regulations and company specifications regarding text, colour, symbols, size, layout and material. Below is an ISO 20560-compliant pipe marker colour coding.

Gases in either gaseous or liquefied conditions	Liquids and fixed materials	Acids	Alkalis	Firefighting equipment	Water	Air	Hazardous substances
---	-----------------------------	-------	---------	------------------------	-------	-----	----------------------

Brady makes your pipe marker sizes compliant based on:

Fully customisable prints

We can supply pipemarkers in any colour with any print that go beyond restrictive solutions that only show the mandatory safety information.

Mandatory safety information*

- flow direction
- GHS/CLP symbols
- pipe contents description

**in most national norms & regulations*

Common efficiency information

- secondary language pipe contents description
- P&ID information
- from source x to destination y
- QR code for electronic recognition

Additional or other information can be included!

Example of a pipe marker design

Flow direction: indicate which way pipe contents flows.

Relevant danger symbols: depending on the substance, in accordance with CLP regulations.

Substance name: wide range of legends available, to comply with the country regulations.

Source & destination: indicate the source & destination connected by the pipe.

P&ID information: add a custom number for identification purposes.

High quality materials: indoor, outdoor or outdoor+ quality to provide reliable pipe identification up to 10 years outdoors.

Colours: in accordance with (local) legislation.

Secondary language: add a second language to communicate with more employees and contractors.

Signal word depending on the substance, in accordance with CLP regulations.

QR-code: add a code that can be scanned to unlock additional information.

Valve marking

For a professional and uniform identification of the substances conveyed by pipes and running through valves, Brady offers a wide range of identification tags, from stock or custom made to your specifications.

Contact your Brady distributor for more information.

Durable plastic tags

- B-418 durable plastic tags have a label area on which you can place your own custom printed label
- The tags are lightweight, non-corrosive, non-conductive, impact resistant and withstand temperatures from -40 °C to 127 °C
- The tag also has rounded corners and a hole punched
- Material: Laminated Polyester on a Plastic Tag
- Label area large tags: 106.60 x 63.50 mm
- Label area small tags: 76.20 x 38.10 mm
- Tags are sold individually

Print your labels using any of the printers in Brady's wide range of sign and label printers.

Continuous stainless steel strapping

- High quality type 316 stainless steel strapping is highly corrosion and heat resistant
- Ideal for installation of HPHV pipe markers, HEET tags or for your own purpose
- Continuous form requires separate heads for use other than HPHV pipe marker installation

Order Reference	Width (mm)	Length (m)
42331	6.35	30.48 m
42332	6.35	76.20 m

Blank HPHV carrier

- Ideal for marking custom markers on the spot
- Fibreglass carrier is blank (no label) and comes with two clips for installation

Order Reference	Width (mm)	Height (mm)
59918	812.80	107.95

Heavy-duty mounting clips

- For use with HPHV pipe markers
- Sold one clip per package

Order Reference	Description
42335	Heavy-duty Mounting Clips

Tape strip roll

- Use extra Tape Strips to re-secure wrap-around pipe markers should they become damaged, or if markers are moved to a new location
- Sold in continuous rolls

Order Reference	Width (mm)	Length (m)
59946	50.80	27.43 m

Print your own pipe markers

Safety printers enable you to print durable pipe markers, safety signs and even safe work procedures on-site and on demand. On-site identification printing capabilities eliminate the need to store various pipe markers for future use. With a few consumables, you can print any pipe marker you need, when you need it.

Brady offers specialised thermal transfer and inkjet printers to create mono-, multi and full colour pipe markers and safety signs in various sizes with durable materials for both in- and outdoor use.

Discover our safety printers!

B-569 high performance polyester

For labelling stainless steel and smooth surfaces

- Recommended for low-halide content for labelling stainless steel pipes and surfaces
- Applies best to very smooth surfaces and ideal for mounting to rigid panels

Contact your Brady distributor to receive a copy of the "Do-it-yourself printing for safety & facility identification" brochure

Fast, simple & powerfully versatile. The way label making should be

BradyPrinter S3100 SIGN & LABEL PRINTER

With the S3100 Sign & Label Printer, you can print a wide range of signs and labels to increase safety and efficiency in any workplace. Safety signs, floor marking, 5S labels, lean labels, labels to identify racks, doors, stairs, bins, desks and chairs and CLP-labels to identify chemicals can all be printed with the S3100 at your location whenever you need them.

- Intuitive built-in features offer ease of use so anyone can walk up and print labels
- Ideal for centralised locations and lean/5S events
- Compatible with powerful Brady Workstation label apps for added versatility
- “Drop in ribbons and labels mean no complicated threading, assembling spindles, sensor adjustment or calibration steps
- You can get on with the job faster, giving you more time for other tasks

Quickly identify small volume products

BBP 35 MULTICOLOUR SIGN & LABEL PRINTER

BBP 37 MULTICOLOUR & CUT SIGN & LABEL PRINTER

Brady's sign and label printers give you the power to make signs and labels in the colours and shapes you need to make an impact – right at your own facility and right when you need them. With remarkable multicolour printing, versatile shape-cutting capabilities and impressively fast print speeds, you won't remember how you lived without one of these printers.

Multiple print colours

Print signs and labels that are more noticeable, more memorable and more effective

Colour is the differentiator when you need to effectively improve workplace safety and productivity

Shape cutting

Revolutionary built-in XY plotter-cutter system in the BBP37 printer (cuts - only selected 101.60 mm materials)

Cut shapes around your messages text and create labels designed to fit your exact specifications

Label making made easy

Intuitive built-in features offer ease of use so anyone can walk up and print labels

Ideal for multiple users, centralised locations and lean/5S events

Compatible with powerful Brady Workstation Label Apps and Facility Identification Software for added versatility

Automatic label setup

Printers read critical information from the supply cartridge and then automatically set it up so you can start printing immediately

No more calibration or wasted labels, no print speed/burn temperature trial labels, no scrolling through screens to select a label and no wasted time setting up label dimensions or text size

20-second material changeovers

“Drop in” ribbons and labels mean no complicated threading, assembling spindles, sensor adjustment or calibration steps

You can get on with the job faster, giving you more time for other tasks
